

AYKO Group delivers crude oils , petroleum products and advanced refining solutions, driving global production and supply operations.

Combining industry expertise with a global business network, the company provides reliable, efficient and market driven solutions that support international trade and premium terminal operations.

OUR BUSINESS AREAS

"Connecting global markets with trust, excellence, and seamless logistics."

TRADING

Global commodity trading with strong market insights, flexible structures and reliable supply.

PHYSICAL TRADING

Direct procurement and international supply of crude oil and refined petroleum products.

SWAP TRADING

Flexible swap structures optimizing regional supply chains and delivery efficiency.

DIGITAL TRADING PLATFORMS

Digital trading supported by real time market intelligence and energy exchanges.

FINANCE

Structured financial solutions and strategic investments to empower energy deals.

PROJECT INVESTMENT

Strategic investments in infrastructure across oil, gas, petroleum, and energy assets.

CORPORATE BANKING

Structured trade finance solutions supporting international oil, gas and petroleum products.

ASSET EVALUATION

Professional valuation of energy assets and commodity based investments.

LOGISTICS

Structured supply chain solutions and Streamlined transport management for global energy.

LOADING TERMINALS

Efficient infrastructure and secure loading and discharge operations.

TANK FARM OPERATIONS

Strategic storage, deposit and premium terminal operations ensuring product integrity.

TANKER FLEET

Advanced maritime logistics and modern vessel fleets delivering reliable global energy transport.

WHY AYKO GROUP

INTEGRATED SOLUTIONS

Direct procurement, international production, and supply of crude oil and refined petroleum products.

GLOBAL NETWORK

Utilizing a strong international trading and logistics network that seamlessly connects markets, partners, and global opportunities.

OPERATIONAL EXCELLENCE

Uncompromising commitment to strict safety protocols, premium quality, and maximum operational efficiency in every single project.

OUR BUSINESS AREAS

"Powering the global energy value chain through integrated operational strength."

UPSTREAM

Comprehensive exploration and production management maximizing reservoir potential safely.

OIL & GAS FIELD

Strategic exploration and operations for resource identification across high-yield fields.

FIELD PRODUCTION

Advanced extraction techniques ensuring continuous and high volume crude oil recovery.

WELL OPERATION

Rigorous field operations and real time drilling tower monitoring driving output.

MIDSTREAM

Secure transportation and strategic storage infrastructure connecting production to world markets.

PIPELINE

High capacity pipeline networks delivering safe and uninterrupted commodity transit.

STORAGE

Strategic pipelines and terminal tank farms providing high volume and secure crude containment.

TRANSPORTATION

Streamlined overland, trains and maritime logistics, optimizing global bulk energy movement.

DOWNSTREAM

Refining, petrochemical processing and commercial distribution channels.

REFINERY

State of the art distillation complexes converting crude into high value petroleum products.

PROCESSING

Precision chemical processing and rigorous quality refinement meeting global standards.

DISTRIBUTION

Extensive commercial supply networks ensuring reliable fuel delivery to international markets.

OUR VALUES

CLIENT FOCUS

CONTINUOUS
IMPROVEMENT

OPERATIONAL
EXCELLENCE

INTEGRITY
&
COMPLIANCE

SUSTAINABLE GROWTH

OUR BUSINESS AREAS

"Driven by integrity, engineered by innovation, and committed to corporate values."

SERVICES

Comprehensive support solutions across oilfield and maritime operations.

DRILLING OPERATIONS
Technical onshore and offshore drilling support maximizing output safely.

EQUIPMENT
Premium industrial machinery operations ensuring high efficiency.

FIELD MANAGEMENT
Rigorous asset management & real time operational monitoring.

TECHNOLOGY

Digital infrastructure and specialized industry automation driving efficiency.

DATA CENTRE
State of the art data infrastructure securing complex energy analytics.

SOFTWARE
Specialized platforms optimizing real time supply chain and trading flow.

DIGITAL & SATELLITE COMMUNICATION
High secure satellite networks and digital communication systems driving seamless global energy connectivity.

TECHNICALS

Advanced project design and engineering consulting for global energy assets.

ENGINEERING
Precision asset engineering and sophisticated structural development plans.

STUDIES
Rigorous feasibility studies and international asset valuation models.

PROJECT MANAGEMENT
Comprehensive blueprints tailoring custom infrastructural energy solutions.

GLOBAL MARITIME

EXCELLENCE

Delivering integrated tanker transportation and marine logistics across global energy supply chains.

CRUDE OIL TANKERS

Providing efficient crude oil transportation through Aframax, Suezmax, and VLCC tanker solutions across international trade routes.

(80.000-120.000 DWT)

AFRAMAX TANKERS

Flexible regional crude oil transportation designed for efficient energy supply and logistics operations.

(120.000-160.000 DWT)

SUEZMAX TANKERS

Medium-to-large crude oil transportation optimized for major international trade routes.

(160.000-320.000 DWT)

VLCC & ULCC TANKERS

Large-scale crude oil transportation through VLCC and ULCC tanker solutions for long haul global energy logistics.

PRODUCT TANKERS

Deploying versatile Handysize and LR class tankers for secure regional transport of refined petroleum products.

(10,000 – 55,000 DWT)

HANDYSIZE & MR TANKERS

Efficient transportation of gasoline, diesel, and jet fuel across regional markets.

(55,000 – 80,000 DWT)

LONG RANGE 1 (LR1)

Long-distance transportation of refined petroleum products with optimized cargo capacity.

(80,000 – 160,000 DWT)

LONG RANGE 2 (LR2)

Large-scale transportation supporting international clean petroleum product logistics.

SPECIALIZED TANKERS

Specialized maritime transportation of LNG, LPG, and chemical cargoes with the highest standards of safety and efficiency.

(5,000 – 40,000 DWT)

CHEMICAL TANKERS

Safe and efficient transportation of industrial chemicals and specialized liquid cargoes.

(15,000 – 85,000 CBM)

LPG CARRIERS

Secure marine transportation of liquefied petroleum gas (LPG) across international trade routes.

(125,000 – 266,000 CBM)

LNG CARRIERS

Advanced cryogenic transportation of liquefied natural gas for global energy markets.

"Worldwide presence. Trusted partnerships Global energy solutions."

MAJOR GLOBAL MARITIME
TRADE ROUTES

OUR MARINE CAPABILITIES

DIVERSE & MODERN FLEET

GLOBAL TRADE COVERAGE

SAFETY & OPERATIONAL
EXCELLENCE

24/7 OPERATIONAL SUPPORT

ADVANCED TECHNOLOGY &
DIGITAL SOLUTIONS

GLOBAL COMPLIANCE & MARITIME STANDARDS

Our fleet operations strictly adhere to international maritime safety, quality, and environmental regulations to ensure seamless global transit.

IMO COMPLIANT

Operating in full alignment with International Maritime Organization standards for maximum vessel safety.

MARPOL CERTIFIED

Strict enforcement of marine pollution prevention protocols across all international trade routes.

OCIMF STANDARDS

Implementation of rigorous Oil Companies International Marine Forum inspection and vetting guidelines.

SUSTAINABLE MARITIME OPERATIONS

Committed to reducing carbon emissions through innovative eco-efficient fleet management and low-sulfur fuel technologies.

DOUBLE-HULL INFRASTRUCTURE

Utilizing advanced double-hull vessel designs providing absolute protection against environmental liquid product risks.

ECO-EFFICIENT FREIGHT

Execution of active energy-efficiency management plans to minimize ecological footprints in global logistics.

OUR PHILOSOPHY

Managing global energy chains from a single source to serve as your ultimate corporate partner.

VISION

Expanding our service network globally to deliver premium production solutions with unified core goals.

MISSION

Utilizing advanced transparency and innovative technology to drive high value growth for our global partners.

design by @busenur.artworks • 2026

OUR BUSINESS AREAS

"Our responsibility today, shapes a better tomorrow."

ENERGY

Strategic transition alternatives driving a sustainable corporate future.

POWER PLANTS

Strategic commercial investments in modern power plants and advanced electricity generation facilities.

STATIONS

Strategic stations managing secure energy flow to regional networks.

TRANSMISSION

High capacity infrastructure for secure and efficient power transmission.

OUR GROWTH JOURNEY

OUR ESG COMMITMENT

ENVIRONMENTAL

Minimizing environmental impact and advancing clean energy solutions.

SOCIAL

Creating value for our people, communities and future generations.

GOVERNANCE

Upholding the highest standards of transparency, ethics and accountability.
